Head of department:
„International economic relations” (Assoc. Prof. Dr. Georgi Marinov)

I. ANNOTATION

The global economy is changing very fast. In the same time the culture is playing an important role with not only artistic mobility and training, but also with social ideas and economical goals. The cultural context of economics is a system of thoughts for the increasing of employment (especially for the young people) and sustainable contribution to the European and worldwide GDP. These strategic guidelines of the economy of culture are called upon the engagement of the policy makers and the training of the cultural managers.

The present curricula lay emphasis upon the specific aspects of the economy of culture in EU-28: awareness of the business dimensions, innovative potential of the cultural and creative industries, enhancement of the social cohesion, financial attractiveness of territories etc.

II. THEMATIC CONTENT
